FALL 2024 COMMUNITY KETAMINE THERAPY

We are excited to announce group integration and group ketamine sessions at Temenos. These group sessions are best suited for individuals with prior ketamine therapy experience. Group ketamine offers the opportunity to learn from fellow group members as well as deepen self inquiry in a more affordable treatment format.

Benefits:

- Deepen insights from ketamine sessions and build connections with others on the path to healing.
- Share and receive support within an interpersonal setting and learn intentional neuroplasticity skills to support the process of integration.
- Access affordable ketamine treatment in a safe and supportive setting.

WAYS TO REGISTER:

- Register via our website by clicking here:
 www.temenos.center
- Or by emailing us at info@temenos.center

15-month interest free financing available via our website by clicking here:

COMMUNITY

KETAMINE GROUP SESSIONS

These small group sessions are intended for those with prior ketamine therapy experience. Group participants will receive 2 virtual 90-minute group preparation sessions to better understand and prepare for the group ketamine experience as well as get to know group facilitators and fellow group participants. Participants must receive a medical evaluation from Temenos in advance. For current Temenos clients, the initial medical intake will suffice. During the preparation groups, facilitators will assist participants with methods of preparation and personal intention setting.

The ketamine group experience will have lozenge and intramuscular routes of administration options. This community circle offers an opportunity to focus on the deeply personal aspects of ketamine therapy with the invitation to share as little or as much as feels helpful during group integration.
